U-drain – Bagless Urine Drainage System

When does it start?
1 October 2013 until 30 September 2015 (with the option to extend 24 months until 30 September 2017)

What’s on offer?
This procurement was led by the drive for innovation and to bring patient choice to the management pathway. U-drain is a permanently installed bagless urinary drainage system for patients who would normally use a night urine drainage bag to accompany a urostomy pouch, penile sheath or urinary catheter. U-drain employs the more hygienic method of taking urine produced overnight and disposing it directly into the main drainage system of the patient’s home.

Who can take advantage?
All NHS SBS Members and Associate Members

Why should I use it?

INNOVATION
- This innovation product is unique in the marketplace and gives patients a choice for the first time in 30 years. U-drain also offers an innovative solution to assist in reducing bacteraemia.

QUALITY OF LIFE BENEFITS FOR PATIENTS
- As this product drains directly into the drainage system and is not a night time drainage bag, patients have more flexibility to move without the worry of the bag leaking or spilling. It also provides better comfort and movement for the patient.

COST EFFICIENCY
- As this procurement offers a fixed price there is no need for re-ordering and prescribing therefore reducing prescribing costs of urine drainage bags. This can also can minimise over prescribing and save on the repeat prescription workload.

How can I find out more?
To find out more about this product, please refer to the buying guide.
